Educational Technology Support

The Health Academy has a dedicated team of technicians that support the wide array of technology and events across the department. From maintaining projectors, to supporting teaching tools, our team is committed to enhance the delivery of learning and conferencing with an aim to improve excellence in education.

Audio-Visual

All teaching rooms at The Health Academy are fitted with state-of-the-art audio-visual systems, installed and maintained by the Ed Tech Team. Our systems are designed hand-in-hand with our range of clinical teaching staff and suppliers to improve the standard of teaching and ensure we deliver the best user experience possible. We are the people to go to if you have any comments, requests, or issues.

Teaching Tools

The Health Academy has a range of teaching tools to improve the engagement of your teaching and events, such as audience participation systems for real-time Q&A sessions, to cross-site streaming for distance learning. Ask us how we can help you use these tools yourselves.

Events and Awards

The Ed Tech Team support both clinical teaching events, and corporate events. We work closely with organisers to ensure events go as well possible, but also add a technological element to make events more interesting, fun, and engaging. We run several awards a year including the WE Thank You Awards and the Our People Awards. Contact us to discuss how we can help with your events.
