| Describes anatomical positions for the chest leads | <input type="checkbox"/> | <input type="checkbox"/> |
| Describes positions of the limb leads | <input type="checkbox"/> | <input type="checkbox"/> |
| Aware of standard machine settings | <input type="checkbox"/> | <input type="checkbox"/> |
| Can recognise and eliminate 3 main types of artefact | <input type="checkbox"/> | <input type="checkbox"/> |
| Interpret ECG 1 | <input type="checkbox"/> | <input type="checkbox"/> |
| Interpret ECG 2 | <input type="checkbox"/> | <input type="checkbox"/> |
| Interpret ECG 3 | <input type="checkbox"/> | <input type="checkbox"/> |
| Interpret ECG 4 | <input type="checkbox"/> | <input type="checkbox"/> |
| Understands the limitation of machine interpretation | <input type="checkbox"/> | <input type="checkbox"/> |
| | Safe | training needed |
| Global assessment | <input type="checkbox"/> | <input type="checkbox"/> |

Doctors skills assessment 12 lead ECG

1. Please name the limb leads and indicate where you would position on the body below:

Doctors skills assessment 12 lead ECG

2. Using external surface markers explain where the chest positions are located.
