

Learning Environment

Ward 12

Learner Booklet

Welcome

We would like to warmly welcome you to Lancashire Teaching Hospitals NHS Foundation Trust (LTHTR). Incorporated on the 1st of April 2005, LTHTR was the first trust in the county to be awarded "Teaching Hospitals" status.

We have created this pack as a useful resource to help you to settle in with us. The purpose of this booklet is to provide you with information to help you on your learning environment.

About LTHTR

We have three equally important strategic aims:

- To provide outstanding and sustainable healthcare to our local communities
- To offer a range of high-quality specialist services to patients in Lancashire and South Cumbria
- To drive health innovation through world class education, training and research

We provide a range of Hospital based health services for adults and children and cover a range of specialities. These include cancer services such as radiotherapy, drug therapies and surgery, disablement services such as artificial limbs and wheelchair provision. Other specialities include vascular, major trauma, renal, neurosurgery and neurology including brain surgery and nervous system diseases.

Our five core values:

- Being caring and compassionate
- Recognising individuality
- Seeking to involve
- Building team spirit
- Taking personal responsibility

We deliver care and treatment from three main facilities:

- Royal Preston Hospital
- Chorley and South Ribble Hospital
- Specialist Mobility and Rehabilitation Centre, Preston

In relation to car parking, please refer to your Induction to the Trust, for information regarding car parking. Additional information can be found on our Intranet page. https://legacy-intranet.lthtr.nhs.uk/car-parking-documents

Learning Environment

We would like to welcome you to your learning environment.

Ward number: 01772 523620/ 01772 523672

Emergency number: 2222

Ward Shift Pattern

Day: 0700-1930

Night: 1900-0730

You will be expected to work any of the above shifts, and your rotas will be assigned to you in advance. Although you will be expected to work the shifts allocated, flexibility will be considered with good reason.

If you are unwell or cannot attend for a good reason, please follow the absence policy whereby you contact the ward in advance, contact university and email learner.absences@lthtr.nhs.uk

Multidisciplinary teams

There are multiple types of people to work alongside. These include:

- Doctors
- Physician associates
- RGNS
- Assistant practitioners
- Health care assistants
- Pharmacists
- Physiotherapy
- Occupational therapy
- Nutrition team
- Stoma nurses
- Speech and language team
- Discharge facilitator
- Discharge assessment nurse
- Social workers
- Safeguarding team
- Acute pain team
- Tissue viability nurses

- Diabetic specialist nurses
- Infection control nurses
- Theatre practitioners
- Night practitioners

As a learner, you are encouraged to ask questions and expand your knowledge base. This will allow you to get the best experience whilst on your placement.

Ward Routine

On arrival to each shift, there will be a printed handover sheet which should have all the information you need regarding all the patients on the ward. You will then go on a full walk round handover where the nurse on the previous shift will handover and this gives you a chance you visualise all the patients.

As the ward has 33 beds, we use an algorithm to handover will allows for accurate and concise handover for each patient.

This is FORCEDS.

- Fluids: Intake diet and fluids, nil by mouth, clear free fluids, IV fluids, TPN etc. Output- voiding in toilet, catheter, stoma, NG, drain etc.
- Observations: Frequency and NEWS
- Risk assessments: MUST, Waterlow, Skin assessment, wound, falls, ELOC, etc
- Care plan: Medications, Wounds, plan of care etc.
- Escalation: Has anything been escalated on the shift previous?
- Discharge: Plans for Discharge
- Skin: Frequency of pressure are care, skin integrity.

Each patient's folder has a sheet in which you are expected to fill out before handover on each shift to allow quick and easy handover.

Colorectal Disease

Colorectal cancer- Colorectal cancer develops from the lining on the digestive tract.

Inflammatory Bowel Disease- IBD is the general term to describe disorders which involve chronic inflammation of the digestive tract. Ulcerative colitis- Causes long-lasting inflammation and ulcers in the colon and rectum. This is usually managed conservatively with medications such as steroids, but patients may be admitted for further treatment such as pain management or surgery.

Chron's disease – Characterised by inflammation of the lining of the digestive tract which spreads into tissue. Chron's can affect any area of the small or large intestine. Similar to UC, Chron's is usually treated conservatively with medications but is more likely to require surgery for symptom management.

Perianal conditions

Haemorrhoids are normal blood vessels in the anal canal. They can cause symptoms such as pain and bleeding when they become enlarged or swollen.

A rectal prolapse is a protrusion of the bowel outside the anus. It can usually be rectified by hand but may later require surgery. They can cause pain, bleeding, feeling of constipation and incomplete emptying of rectum, and passing of mucous. Symptoms usually increase as the size of prolapse increases.

Pilonidal Sinus

A pilonidal sinus is a small hole or tunnel in the skin at the top of the buttocks. It doesn't always cause any symptoms and only requires treatment if infected. Infections usually require drainage and antibiotics. This may be done in theatre with general anaesthetic, or on the ward with local anaesthetic. Recovery time is approximately two weeks but hospital admission is usually only 1-2 days, if surgery is required

Abbreviations

Abbreviation	Meaning
AAA	Aortic abdominal
	aneurysm
AKA	Above knee amputation
APT	Acute pain team
AXR	Abdominal X-ray
BD	Twice daily
BKA	Below knee amputation
BPH	Benign prostate
	hypertrophy
BM	Blood glucose level
CABG	Coronary artery bypass
	graft
CBD	Common bile duct
CFF	Clear free fluids
CKD	Chronic kidney disease
CNS	Clinical nurse specialist
CT	Computer tomography
	scan
CXR	Chest x-ray
D+F	Diet and fluids

5.1.1.6
Pelvic inflammatory
disease
Prescribed
As required
Four times a day
Removal of clips
Removal of sutures
Routine ward test of urine
Strict fluid balance chart
Surgically fit for discharge
Soup and sweet
Short of breath
Total abdominal
hysterectomy
Three times a day
Total parental nutrition
Trial without catheter
Transient ischaemic attack
Upper gastrointestinal
Ultrasound scan
Venous thrombo-
embolism

Induction

The Local Induction process will take place throughout the first week of your placement.

This will comprise of:

- Trust and department orientation, including housekeeping information
- Location of emergency equipment
- IT access
- Reading & acknowledgement of Mandatory Trust policies such as Health & Safety, Fire Safety, Infection Control, Information Governance, Staff Code of Conduct, Social Networking and Dress Code policies.
- Adult Basic Life Support training if applicable
- Trust Moving & Handling Training if applicable
- COVID-related policies & procedure
- Orientation
- Professional voice: freedom to speak up, datix, chain of command, open door policy
- An awareness of our Educational Governance Team- evaluation and importance of feedback
- Inter-professional Learning Sessions
- Practice Assessment Record and Evaluation (PARE) training, if applicable
- Collaborative Learning in Practice (CLiP™), if applicable
- How the role of Practice Development Facilitator can support you, where applicable

What to bring on your first day

- Uniform: All other items in the dress code policy must be adhered to https://legacy-intranet.lthtr.nhs.uk/search?term=uniform+policy
- A smallish bag which would fit into a small locker.
- You may wish to bring a packed lunch and a drink on your first day.

Inter-professional Learning Sessions and eLearning Resources

At our Trust, our Education Team facilitates a yearly programme of Inter-professional Learning (IPL) sessions. This programme consists of various teaching sessions, delivered by our Specialist Teams, to support and enhance our learners and trainees' learning experience with us.

Inter-professional learning is an important part of your development and allows you to build professional relationships and communication skills with the wider multi-disciplinary teams. Our IPL sessions are valuable in supporting you to stretch your knowledge and experiences to enhance your clinical practice. They also help bridge the gap between theory and practice, allowing you to hold a deeper understanding of the topics discussed. Our sessions are open for all learners and trainees on placement at our Trust to attend and these learning opportunities are an extension to your learning environment; therefore, these hours need to be recorded on your timesheets. We encourage our staff to facilitate enabling a learner/trainee to attend these sessions.

Please note: You must inform your learning environment prior to attending a session. These IPL sessions need to be discussed in a timely manner with your learning environment.

You are required to complete a reflection on each of your IPL sessions, as well as documenting on your HEI documentation what you have learnt and how this relates to your current placement.

You can book onto our IPL Sessions by accessing this link https://elearning.lthtr.nhs.uk/login/index.php and searching for 'IPL'.

You can access our policies and procedures via our Intranet page, which will help expand and stretch your knowledge.

Support with evidencing your learning outcomes or proficiencies

We encourage you to use the Trust learning logs to collate and evidence your skills, knowledge and abilities achieved. You can then present your completed learning logs to your Practice Assessor/Educator during your assessment meetings. Any staff member who is involved in coaching you can complete your learning log feedback.

You can request time during your placement hours to complete these and request feedback prior to the shift ending. To obtain a copy of our learning logs, please visit our Health Academy Webpage on the link below, where you will see a copy of our CLiP™ Learning Log available for you to download, on the right hand side - https://healthacademy.lancsteachinghospitals.nhs.uk/support/clinical-placement-support/collaborative-learning-in-practice-clip/

Chain of Command

Keeping patients safe, providing the best care that we can and learning in an environment where you feel safe and valued is important to us. Speaking up about any concern you have on your learning environment is also important. In fact, it's vital because it will help us to keep improving our services for all patients.

There may be occasions where we witness, experience or are asked to do something that causes us concern. Often, these concerns can be easily resolved, but sometimes it can be difficult to know what to do.

Our Clinical Placement Support Team are available Monday – Friday, 8.00am – 4.00pm should you need to contact them in relation to any concerns regarding your learning environment. If your concern relates to patient safety and/or your concerns are outside of these hours, please follow the chain of command in your learning environment and speak with the person in charge.

Please visit our Freedom to Speak Up page on the Intranet for more details.

We value your feedback

Our Trust values your feedback. To continuously improve, we offer opportunities for our learners and trainees to provide feedback regarding both your learner experience and your learning environment. We would encourage you to kindly complete your end of placement evaluation, within your clinical hours.

We will keep you updated with the improvements that we make based on the feedback you provide us with.

Learning Environment Improvement Forum

Our Learning Environment Improvement Forum began in November 2021, with key stakeholders attending; Learners, Trainees, Clinical Staff, Education Leads and our Nursing Directorate. Monthly meetings are held to share new and innovative ideas as to how we can collaboratively enhance our learning environments, to support both learners, trainees and staff.

All attendees at the Learning Environment Improvement Forums contribute their suggestions and guidance on our projects. Collaboratively, exciting improvements are implemented to enhance our learning environments.

Innovative changes made by our Learning Environment Improvement Forum, within Academic Year 2021-2022;

- NEW Learner Boards designed and placed on our learning environments
- Learner booklets made available on our Health Academy webpage to prepare our learners and trainees for their clinical placements, as suggested by our learners and trainees
- PARE and CLiP™ training embedded into our Learner and Trainee Inductions
- Quick Reference Guide designed and created to welcome our learners and trainees to the Trust and prepare them for their clinical placements

We welcome any of our staff, learners and trainees at the Trust to attend our Learner Environment Improvement Forums, to contribute your ideas and suggestions for our new and innovative projects. You can join via the E-Learning Portal - https://elearning.lthtr.nhs.uk and going to Courses, then selecting the tab 'Inter Professional Learning', where you will see our forum listed.
